

Arin K. Jaff

New York — (425) 229-1603 — akj2147@columbia.edu —  github.com/arin-jaff —  arinjaff.com

EDUCATION

Columbia University, New York, NY Sep '22 – May '26
BA, Computer Science — GPA: 3.82/4.00 — D1 Varsity Lightweight Crew — Cloud Computing TA — Dean's List

TECHNICAL SKILLS

- **Languages:** Python, TypeScript/JavaScript, SQL, C/C++, Rust, Java, HTML/CSS, R, $\text{\LaTeX}$
- **ML/AI:** Anthropic/Claude API, LLM Agent Pipelines, MCP Servers, PyTorch, HuggingFace Transformers, LoRA/QLoRA Fine-Tuning, Pydantic, NumPy, Pandas
- **Infrastructure & Web:** Next.js/React, FastAPI, Flask, GCP (Cloud Run), AWS (Lambda, S3, DynamoDB), Docker, Terraform, Redis, PostgreSQL (Supabase), SQLite, MongoDB, Git, CI/CD
- **Relevant Coursework:** Machine Learning, Artificial Intelligence, Natural Language Processing, Large Language Models, Analysis of Algorithms, Computer Networks, Cloud Computing (AWS), Ethics of LLMs

PROFESSIONAL EXPERIENCE

PHIA, *Software Engineer, GTM*, New York, NY Feb '26 – Present
Translating business workflows into production AI systems

- Designed and launched the company's first **MCP servers** (Docker/Cloud Run, Terraform), exposing internal CRM and analytics databases to LLM agents with natural-language query, bulk-write, and affiliate-link tooling; auth and routing conventions **adopted by all subsequent internal AI services**.
- **Sole owner** of customer-facing self-serve web platform (Next.js/Vercel, GCP) serving **1,000+ brand partners**, plus an automation delivering personalized email-safe performance reports with live data from **20+ affiliate network APIs**.
- Implemented a headless rendering service producing pixel-accurate iOS app screenshots with custom elements, exposed as an **MCP tool** powering AI email automation that drafts client-ready replies, **cutting response turnaround 30%+**.

GARMIN LTD., *Software Engineer Intern, Device Interactions*, Olathe, KS May '25 – Aug '25
Wearables Backend & Public API Infrastructure

- Engineered a backend wearables service **shipped to production** in the **Forerunner 970/570 launch**.
- Built a failover system for the **public Garmin Weather API** (Java Spring Boot, **Redis** state management), cutting endpoint error rate by **99%**.
- Owned features from design through **CI/CD production deployment** in agile sprints; demoed at weekly stand-ups.

COVET INC., *Full-Stack Software Engineer Intern*, Seattle, WA May '24 – Aug '24
Scalable Onboarding & Systems Automation

- Launched a **company-first AWS-backed onboarding service** that facilitated the **first 100+ client acquisitions**.
- Implemented a sitewide **rule engine** that cut client configuration errors by **99%+**.
- Automated **legal document generation** with built-in validation, streamlining the customer onboarding flow.

UNIVERSITY OF CHICAGO, PROF. JOHN LIST, *Research Assistant*, Chicago, IL May '23 – Aug '23
Behavioral Economics Research & Data Automation

- Won the **department-wide intern research competition** with a **data-driven** paper on brain drain.
- Cut citation-verification time by **80%** for *The Voltage Effect* (ISBN: 9780226820675) by building **automated database/API services**.

PROJECT EXPERIENCE

TRAININGGEEKS, *Open-source, self-hosted endurance & strength analytics platform*  arin-jaff/TrainingGeeks
Local-First Training Analytics, Federation Protocol & OSS Maintenance

- Built and **open-sourced (AGPL-3.0)** a **28K+ line TypeScript** platform (Next.js 15, `node:sqlite`, Garmin FIT SDK, ECharts/uPlot): training calendar, **CTL/ATL/TSB performance modeling**, strength analytics with 1RM estimation, and intervals.icu sync; shipped a **macOS desktop release** (Tauri + Node sidecar) via an automated release pipeline.
- Designed a **federation protocol** and pluggable **directory server** (Node 24/Hono/SQLite) enabling independently self-hosted instances to share activity feeds, kudos, and leaderboards while **all training data stays on the user's machine**.
- Maintain full **open-source infrastructure**: GitHub Actions CI + Dependabot, unit/integration test suite, contributor docs (CONTRIBUTING/SECURITY), versioned releases, and a **live public demo** (demo.traininggeeks.net) self-hosted on a Raspberry Pi.

ERG ROOM TRACKER, *RFID-based attendance system for Columbia Lightweight Rowing* Personal Project
Embedded RFID & Real-Time Web Service

- Built a **real-time presence tracking** system serving **30+ D1 athletes** using Raspberry Pi, RFID+NFC, and a **Flask** web app.
- Deployed to production behind **Cloudflare Tunnel** (SQLite + HTMX), **eliminating manual attendance logging** for daily team practices.

LEADERSHIP & ACHIEVEMENTS

IRA National Rowing Championship Medalist, Bronze, *Columbia Lightweight Varsity Crew* May '25
WashU St. Louis Olin Big IdeaBounce, *Runner-Up Venture Award with Cash Prize*
Eagle Scout with Silver Palm, *Boy Scouts of America*
